CAREER OBJECTIVE:

I am seeking a technical, full-time position that will effectively utilize my education, training and experience in the field of Information Systems that offers professional challenge and growth opportunity.

PROFESSIONAL SUMMARY:

- 8+ years of experience in implementing and maintaining enterprise level Data networks.
- Knowledge of Configuring, implementing and troubleshooting the Routing Protocols OSPF, EIGRP, BGP.
- Knowledge of Configuring and maintaining the switched L2 networks VLANs, Port-channel, VTP, STP, RSTP, MSTP, GLBP, HSRP, VRRP, Port Security, Port-fast Port, Access list, BPDU Guard, BPDU Filter, NAT, PPP.
- DHCP Pool upload in Infoblox server for newly added branch locations.
- Highly experienced in Installing, Configuring and Troubleshooting the network devices Cisco Catalyst (2960 series) Switches and Cisco Routers (ISR4221-K9 / ISR4321-K9/ ISR4331-K9 / C881-K9/CISCO881K9/C1841-K9/ C891F-K9/C1941-K9/C1111-8U/C1111-4U/C841/C867-k9).
- Strong hands-on experience in maintaining and troubleshooting network connectivity at Remote location.
- Delivery of Link at Data Center as well as at branch office locations.
- Follow standard configuration process and hardening to mitigate vulnerability.
- Perform fail-over of traffic under DR DRILL activity to ensure high availability for allbusiness applications and services hosted in DC.
- Planning major changes in the network and own the task till closure.
- Knowledge of Configuring and managing the FortiGate Firewall, SDWAN devices.
- Prepared the low-level diagram for Data center and DR.
- Work on AWS Auto scaling, AWS Route 53, AWS EC2, VPC, Peering, Transitive Gateway, Security Gateway, NACL, AWS ELB, AWS CloudWatch, AWS CloudFront, AWS Shield, AWS Firewall Manager, AWS WAF, VPC Endpoint, AWS Private link, AWS Direct connect, AWS Site to Site VPN, AWS NAT Gateway.

TECHNICAL COURSE:

- Eight months of CCNA training from Proactive IT Services Pvt Ltd.

SOFTWARE TOOLS:

- Putty, Multi Putty
- Infoblox
- ARCOS(Jump Server)

TICKETING TOOLS:

- CISM
- Service NOW
- TUFIN
- Symphony summit
- Sapphire

MONITORING TOOLS:

- HP-NNMI
- Forti Manager
- Forti Analyzer

TECHNICAL SKILLS:

- Routers:** Cisco Routers ISR4221-K9 / ISR4331-K9 /ISR4321-K9/ C881-K9/ C841F/ C1111-8U/ C891F-K9/C1941/C867-K9.
- Switches:** Cisco Catalyst 2960, 3560, Juniper Switches.
- Routing:** Static Routing / EIGRP / OSPF / BGP.
- Switching:** VLAN / VTP / STP / Ether channels / Port Security / Port fast port/RSTP/MSTP.
- LAN:** Ethernet / Fast Ethernet / Gigabit Ethernet / Fiber/ Scrimping.
- SDWAN:** FortiGate-60F, FortiGate-40F, FortiGate-1100E, FortiGate-100F.
- Firewall:** FortiGate 1200D, Checkpoint (Smart Console 81.20).

EDUCATION:

- Bachelor's degree in Electronic & Telecommunication Engineering from Shivaji University, Kolhapur.
- Completed Intermediate from Maharashtra State Board.
- Completed High School from Maharashtra State Board.

EXPERIENCE:

Bharti AXA Life Insurance Ltd

Mar 2023 to Till Present

Role: Associate Manager – IT (Cloud, NW & Security)

Responsibilities:

- Administration and Management of AWS Cloud Infra, Network (SDWAN) & Network Security.
- Spearheaded the end-to-end rollout of a centralized Network Access Control (NAC) solution across 217 branch locations PAN-India, securing over 5000+ endpoints.
- Led end to end management of network issues across 217 branches and ensuring high availability and minimal downtime.
- Provided advanced troubleshooting for network, security and AWS cloud networking environments.
- Manage and lead for Data Center migration from traditional NW to SDWAN.
- Manage and lead for Partner/Vendor tunnel migration and end to end application testing.
- Partner/Vendor team management.
- Managing budget and check for cost Optimizations within existing infrastructure operations.
- Manage and lead for certificate renewal for business websites/URLs.
- Manage and lead for Firewall and Switches Firmware Upgradation.
- Reviewed and analyzed implemented Checkpoint/FortiGate Firewall policies, User access in Quarterly basis.
- Involved in technical troubleshooting call related to Network, Security, AWS.

- Prepared low-level and high-level network flow DC diagram.
- Prepared the Audit report as per the requirement.
- Providing L3 level of support currently.
- Configured VLAN segmentation, posture validation, and application aware traffic management within NAC policies.
- Integrated NAC with SIEM tools for centralized monitoring and incident response.
- Conducted detailed requirement analysis to define NAC policies aligned with organizational security and compliance standards.
- Design scalable NAC architecture supporting 802.1X authentication, endpoint profiling.
- Conducted vendor evaluation for new requirements including network devices procurement, engineer support services, SSL Certificate renewal etc.
- Preparing the Agreements with vendors
- Coordinating with procurement team, Finance team for PR-PO creation and payment related queries.
- Managed SSL certificate life-cycle including renewals and compliance documentation.
- Ensured network devices adhered to compliance standards, prepared and delivered artifacts to auditors for IT Network/Security audits.
- Prepared the High level and Low-level network architecture diagrams.
- Prepared project plans, execute implementations and monitored progress for network and security initiatives.
- Coordinating with service providers and application teams to deliver solutions during vendor on-boarding.
- Implemented cost optimization strategies for network architecture.
- Managed daily, weekly and Monthly reports for the leadership visibility.
- Prepared, Implemented the WiFi, NAC solution for overall PAN locations.
- Preparing the Service Agreement between Vendors/Partner and BAXA.
- Providing the required Artifacts or Proof to the Auditors related to Network and Security.
- Enforced continuous compliance management by mapping network architectures against internal security baselines and external regulatory frameworks.

Infosys Technologies Ltd
Project: Daimler (Mercedes-Benz)
Role : Technology analyst
Responsibilities:

Oct 2021 to Mar 2023

- Experience in handling the international client support in different countries (Thailand, Vietnam, Malaysia).
- Streamline the process of troubleshooting and Monitoring LAN/WAN/AP activities and leading to improvement in Up-time.
- Responsible to fix the critical issues like P1, P2 by scheduling the meeting with respective team to fix the issue withing SLA.
- Responsible to Co-ordinate with customer for any network related activities to till smoothly completed.
- Responsible for arrangement of network related activities like iOS/Firmware upgradation of Switches and Routers.
- Responsible to troubleshoot the L1 issue related to network with the help of customer and informed L2, L3 team if support required.
- Responsible for handling the network, Security related tickets on Daily basis and reporting to Manager.
- Arranging the weekly meet with customer to discuss network related issues.
- Responsible for preparing the weekly and Daily reports.
- Providing the remotely support to international client via Teams call, Mail chain.
- Prepare and present Network related issue report in PPT with client and team during Weekly governance meeting.

ITSource Technology Ltd (Wipro Infotech Ltd)
Wipro Infotech Ltd
Project: BHFL Enterprise Network
Role: Network Administrator
Responsibilities:

Feb, 2019 to Feb 2021
March 2021 to Sept 2021

- Responsible for Installation, configuration and troubleshooting of network products like Router, switches etc.
- Working on Installation, configuration and troubleshooting of protocols like BGP, OSPF, EIGRP etc.
- Working on configuration of vUTM+ILL link.
- Providing remotely support to customer related network slowness or application slowness issue.
- Co-ordinate with ISP-Spoc for new link delivery at Data Center as well as at branch office location.
- Co-ordinate with ISP Technical team for new link delivery and router configuration.
- Monthly taking backup for whole network equipment's.
- Providing Service Improvement Plans in the existing setup, identifying Risks.
- Responsible for customer branch link monitoring and ensure proper communication and quick resolution.
- Perform failover of traffic under DR DRILL activity to ensure high availability for all business applications and services hosted in DC.
- Creating and sending the Daily, Weekly and Monthly reports to higher management for visibility on network infra.
- Prepare and present Network performance report in PPT with client and team during Monthly governance meeting.

Galore Network Pvt Ltd
Project: Tata Communication Ltd
Role: Service Assurance & Service Delivery Engineer
Responsibilities:

July-2017 – Feb, 2019

- Experienced in network hardware/link installation at Customer end.
- Experienced in Configuring/Troubleshooting RF devices RADWIN, CAMBIUM, WI-MAX.
- Racking/stacking and commissioning of network devices, CAT5, CAT5e, CAT6 and single/multi-mode fiber cables.
- Installs and maintains fiber and copper LAN and WAN links.
- Climb on Tower (Up to 24m mast) to resolve problems related to sector or RF devices.

ACHIEVEMENT:

- Received the Best Talent – Quality Scores award during Covid crisis in the quarter (2019-2020) from Wipro Infotech Ltd for extended support.
- Appreciated by Client for the effort and excellent work in supporting BCP exercise 2020.
- Successfully delivered around 200 links to client's office and partner locations to support client growing business.
- Honored with the Xtra Mile Award (Q2 - FY 2025-2026) for the successful, PAN-India deployment of the Network Access Control (NAC) solution.
- Received the Long Service Award in recognition of 3 years of loyal, dedicated, and distinguished service to the organization.
